Making British gardens great

AT HOME IN YOUR GARDEN

FENCING • BUILDINGS • LANDSCAPING • GROWING

THE GARDEN COLLECTION 2022

Be *inspired.*

At Forest, we know the joy of gardens. Everything we produce has been designed to help you create a garden you'll enjoy for years to come whatever the size.

From beautifully crafted traditional classics to contemporary decorative features and structures – everything is manufactured to look good and last. Whether you want to create a shady spot to relax in with our pergolas and gazebos, extend your working space with garden buildings or start to grow your own produce, you'll find all you need in this brochure for a beautiful garden.

Contents.

Well made in Britain.

The great British garden is our home. For over 50 years we've been the nation's leading manufacturer and distributor of high quality, wooden garden products. From sheds, garden buildings, summerhouses and decorative structures through to decking, fencing and grow your own – we've got something for every type of outdoor space. You'll find our products online and in over 3000 retail stores across the UK.

We're proud to be a British company using sustainable, British timber. With excellent customer service at the heart of our operation and an industry leading distribution service, our products are available for delivery to homes across the UK.

Well made in Britain.

The majority of timber we use is from trees grown in sustainable forests in the UK. It is then processed through our sawmill and assembled in our UK factory.

Beautifully built.

If you'd rather take a back seat when it comes to building, don't worry. Our Assembly Service, available on selected products, means your new purchase is in safe hands and you can leave all the hard work and heavy lifting to us.

Installed items are indicated with **IN** before the product code.

Delivered, on the dot.

At Forest, we don't like to keep you waiting. That's why we offer nationwide delivery to your home within 5 working days* on the majority of our products. Your new product will be delivered on the day of your choosing, giving you time to clear and prepare your garden.

Home Delivery items are indicated with (HD) after the product code or **HD**.

*Delivery times subject to product availability and any restrictions in place at the time.

We stand the test of time.

To ensure that your products look good and last, they are professionally treated. Dip Treated products come with a 10 year Anti-Rot guarantee, Premium Pressure Treated products come with a 15 year Anti-Rot guarantee, giving you the confidence that they're built to last. For more information on how to care for your products see page 126.

Garden guides.

You're just a click away from Garden Guides - our series of online films. You'll find everything from product guides and 'How To' videos to instructions on installation, timber treatments and construction. youtube.com/c/ForestGarden1/

Helping everyone thrive.

We like to do our bit for charity. None more so than Thrive, which uses gardening as therapy to bring about positive changes in the lives of people living with disabilities or ill health, or those who are isolated, disadvantaged or vulnerable.

Sustainable *timber.*

Timber is at the very heart of our business. As a natural product it blends seamlessly into your garden and will last for many, many years. We're proud to say that the majority of the timber we use is cut in our very own sawmill, from trees grown in the UK.

Our range is certified by the Forest Stewardship Council®, with the majority of our products carrying the FSC® logo. This means that our timber comes from sustainable, responsibly managed forests that are replanted for future generations.

***Grown in Britain.
Sawn in Britain.
Made in Britain.***

The majority of the timber we use is grown and felled from managed UK forests across Scotland. After felling, the timber is sawn and processed in our nearby sawmill and taken to our manufacturing operation in the heart of Britain. It is here our skilled workforce proudly design and produce the widest range of garden buildings, fencing and structures available in the UK.

All of the products that we sell are dispatched from this site. Here the final part of their journey is managed by our dedicated delivery department who are responsible for distribution to stores or direct to customers' homes by our fleet of vehicles.

Features & Structures.

Larger features and structures help to create a focal point in the garden, establishing a framework. When designing a garden these elements can make a huge difference to transforming the overall look. They act as a first stepping block around which planting and other elements can be built.

Our arches, arbours, pavilions and pergolas are the perfect way to introduce a unique and decorative structure to your garden. Whilst our beautiful gazebos and NEW summerhouse range are not only a feature in their own right, but provide a sanctuary to escape to.

Corner Transformation

with *Martyn Wilson*

Martyn Wilson is a multi-award winning garden and landscape designer. Martyn has designed several award winning gardens including winning the coveted RHS Gold Medal and has featured on BBC Gardeners World.

After

Before

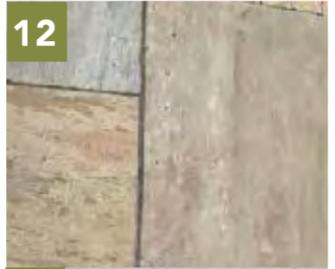

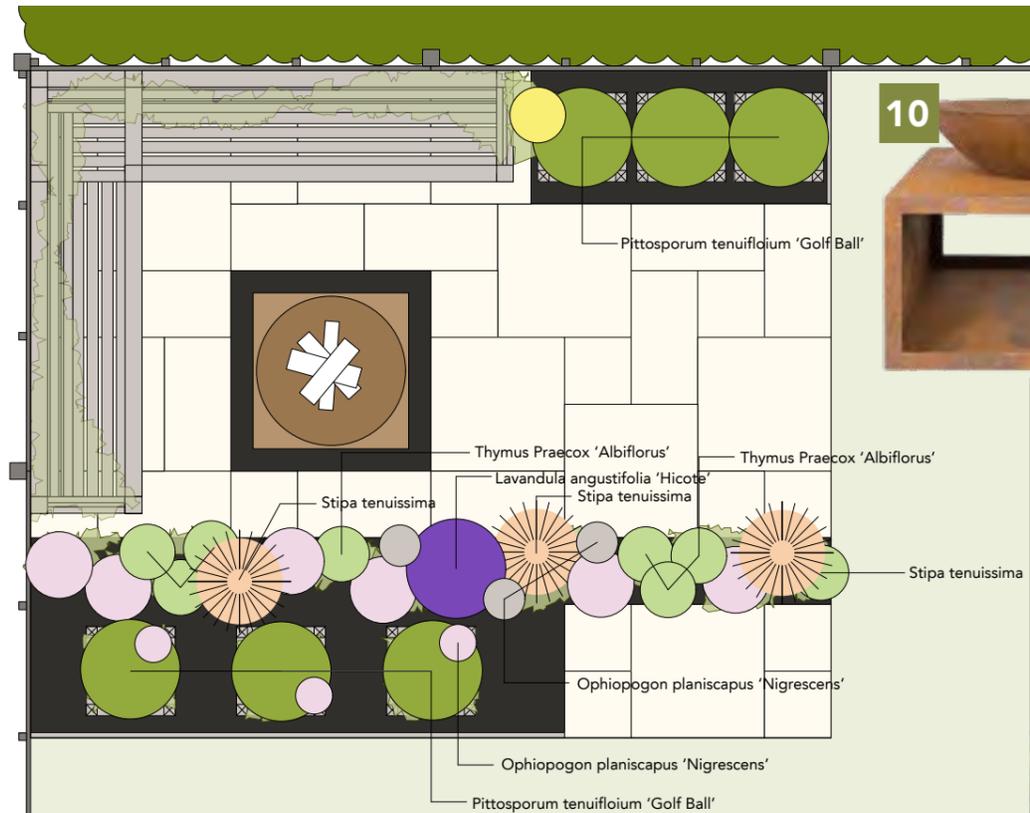

We love an unused garden corner, so we challenged Martyn Wilson to transform a disused corner of a family garden using our new Firenze Corner Arbour. The brief was a stylish space where the whole family could relax and enjoy a drink in the evening when the sun sets on this spot. What an amazing before and after makeover!

Create your own

Want to create your own sophisticated corner space? Here's all you need to add instant style to an unloved corner.

Pergolas & Pavilions.

Adding a large feature can make a huge impact on the design of your garden. As well as retaining structure as the seasons change, pergolas and pavilions provide height and create a focal point in the garden.

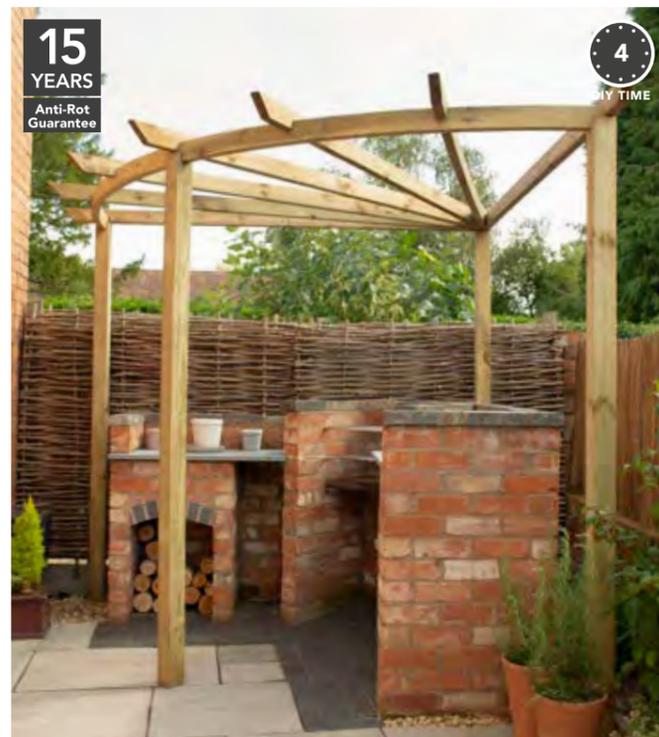

Modular Pergola

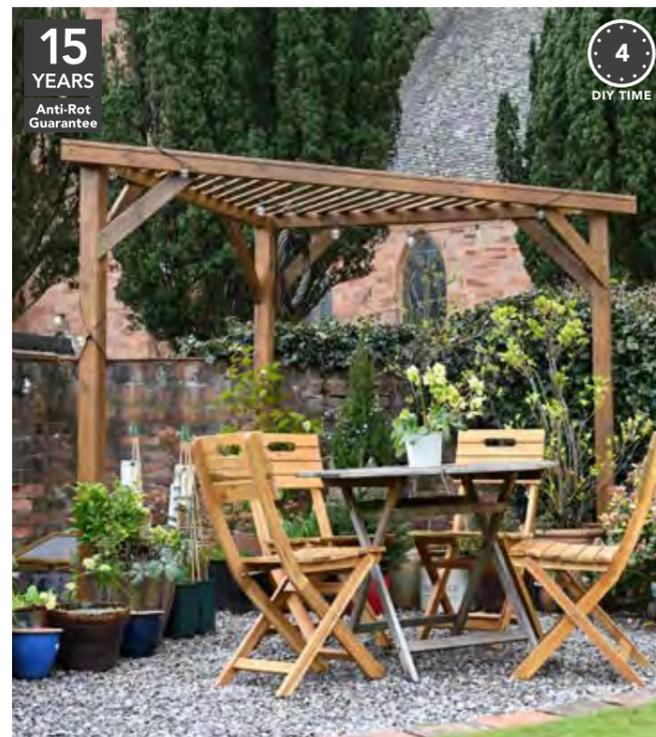

Our Modular Pergola is perfect to create a stylish and contemporary outdoor seating area on a patio or in an unused corner of your garden. The horizontal slats create a modern look whilst offering some shade and privacy. With four options – with or without side panels – you can choose a pergola to suit you.

Venetian Pavilion.

Add a real talking point to your garden. Our Venetian Pavilion provides the perfect shady spot to relax, entertain or dine with family and friends. The stunning pavilion with its eye-catching roof design is available with an optional deck base. This striking structure will let in lots of natural light but also offers protection from the harsh sun or a summer shower.

Craft Beer Bar

Tiki Bar

Garden bars are proving to be one of the biggest garden trends. Recent Aurora research by Forest Garden suggests that 6 million* people in the UK are creating outdoor entertainment areas to be able to host friends and family at home. Forest Garden has created a new modular garden bar that can be spruced up by painting it or enjoyed as it is. We've taken our Garden Bar and created an elegant Gin Bar. Our contemporary slatted panels behind complete the look perfectly.

*Aurora report compiled for Forest Garden into Garden Trends March 2021

Round Timber Gazebos.

Whether you dream of a simple peaceful moment with a well-earned glass of wine and a good book, a leisurely meal outside with the family or hosting that amazing al fresco party, a hand built Round Timber Gazebo from Forest can turn your dreams into reality.

1 Choose your size.

With a choice of 7 sizes, all our Gazebos are made from smooth-planed Radiata Pine and are Pressure Treated with a 15 year Anti-Rot guarantee.

Hexagonal Garden Gazebos
Available in 3m, 3.6m, 4m and 4.7m.

Premium Oval Gazebos
Available in 5.1m and 6m.

Square Gazebos
Available in 3.5m - with and without a base.

2 Choose your roof type.

We offer a choice of roof type, each of which will give your Gazebo a different look and feel when finished. Our Country Thatch roofs, only available on the Hexagonal Gazebos, are lined with heavy duty, weatherproof canvas, whilst our New England Cedar and Traditional Timber roofs come with a waterproof Tricoya lining.

Garden Furniture.

Garden furniture helps to create a liveable space. A seating area can help transform a section of your garden into an outdoor haven. Our designs allow you to take your style, and your lifestyle outside. Wooden furniture that is built to last from beautiful natural timber and is easy to maintain, will blend seamlessly into your garden. Whether you love relaxing with a glass of wine or dining al fresco, our outdoor living range can help you make it all happen.

Outdoor Seating Inspiration.

Living spaces are no longer just indoors. More people are choosing to create luxury seating areas to enjoy their morning coffee and relax in the late summer sun. Using planters behind bench seating creates a cosy corner while embracing the outdoor greenery. Add a few soft touches and you've created an outdoor seating area that you can enjoy year round.

Create your own

Using natural materials and muted colours creates a stylish space that celebrates the great outdoors. A few key design choices can revamp a tired seating area into a space that you use at every opportunity.

Expert insight.

This versatile design can be used as a planter or table.

Planting & Growing.

There's no better feeling than the overwhelming sense of pride and achievement of growing your own. So, whether you're starting out with a small herb garden, or keen to go all-out with a veg patch or greenhouse, we've got just about everything you need to get your fingers even greener.

Transform an unloved corner of your garden with our new, stylish, contemporary corner planters.

Planters.

Add a stylish touch to your outdoor living space with our range of garden planters. Perfect for adding a splash of colour to any patio, courtyard or doorway – whatever style of garden. Our planters cover all of your growing needs – from the contemporary Linear range to our NEW corner range to our raised planters that are suitable for growing a variety of herbs and vegetables.

Transform an unloved corner of your garden with our contemporary Linear Corner Planter. Ideally sized for a variety of decorative shrubs such as box, standards or miniature firs it will look beautiful when filled with flowering plants. The planter has a modern look, with strong horizontal lines and natural timber colouring. It's sure to add interest and structure to any garden.

 *Expert insight.*

Combine our Linear Corner Planter 1.6m with our Double Sleeper Bench (Page 37) to create a perfect corner seating area.

Expert insight.

The Grow Bag Tray Container also comes with a useful cross beam for tying your canes to in order to keep them straight and upright.

GROW BAG TRAY CONTAINER
GBTRAY(HD)
60(h) x 115(w) x 55(d)cm

Grow Bag Tray Container.

Tomatoes are Britain's most popular grow your own crop and are likely to be the first produce any proud new gardener will experience growing. With most unsightly grow bags sat within dull trays in full view, our new container creates both an attractive and functional feature for your patio. Easy to assemble, this container reduces the need to bend and kneel to plant and tend your crops.

1 Assemble the container.

This product is quick and easy to put together.

2 Insert grow bag tray.

The container is designed to fit a standard 100cm x 40cm tray.

4 Fix the cross bar.

Provided to help stabilise your support canes, this bar runs the full width of the container.

5 Secure the support canes.

To ensure your plants grow upward, use canes to help support them.

3 Plant up.

Add your grow bag and insert your plants – this is ideal for tomatoes.

6 Watch your plants grow.

Raised to an accessible height, you can easily tend to your growing plants.

Composters.

Home composting is the most environmentally friendly way of dealing with your garden waste, plus the compost it produces is an excellent soil improver. Our Slot Down Composting Bins allow you to simply remove individual side boards to reach your mature compost, whereas our Beehive Compost Bin features a trapdoor at the bottom providing easy access.

Victorian Greenhouses.

The golden era of the Victorian Glasshouse saw increasingly grand architectural buildings. Built to propagate and display plants from around the world they were designed to maximise light and create the perfect temperature for the exotic varieties inside.

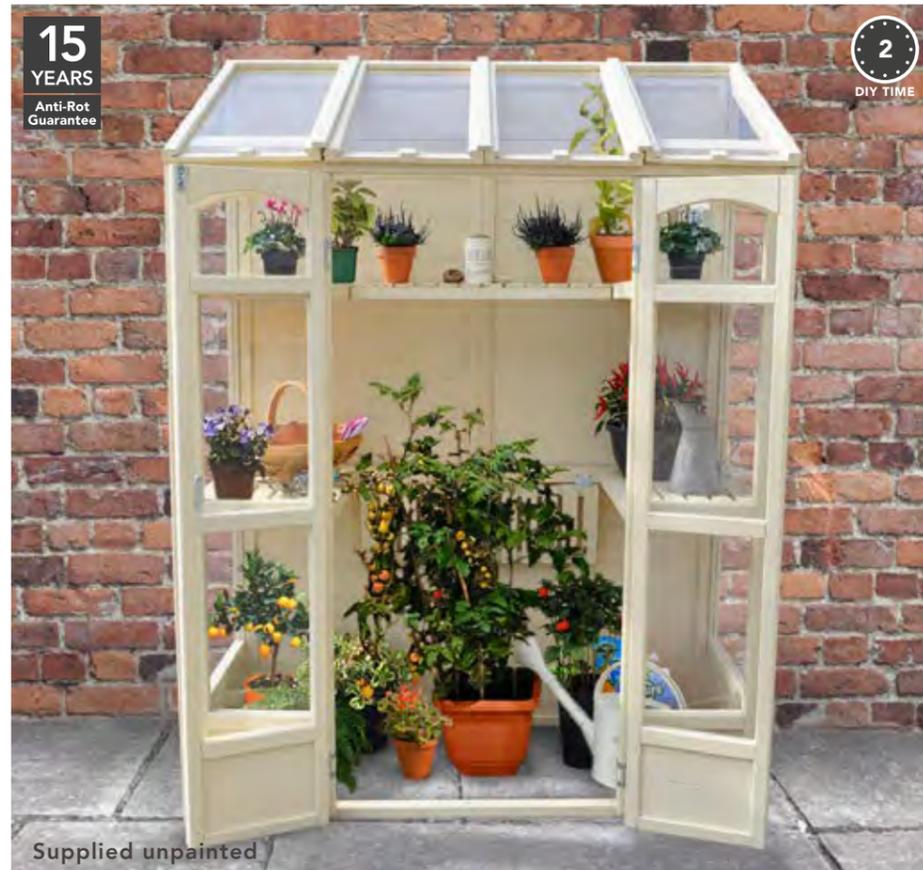

As the interest in all things botanical continued, buildings became simpler and those with smaller spaces could now cultivate plants and grow food for home consumption.

This evolution to lighter, functional, self-assembly glasshouses provided the inspiration for our range of Victorian Greenhouses today.

Victorian Tall Wall Greenhouse.

A flexible and compact greenhouse with acrylic glazing. Ideal for gardens where space is at a premium. Includes two heights of shelving: middle staging can be dropped down to accommodate tall plants and a grow bag.

Georgian Tall Wall Greenhouse.

Our Georgian Tall Wall Greenhouse is the perfect solution for smaller gardens or tight spaces. Its elegant, steeply pitched rooflines and distinguished looks from Georgian inspired design provide a perfect focal point for your outdoor area. The back panel means that you don't have to place it against a wall to keep your plants protected.

The tall and slender panes let in lots of light for your plants and an opening window with auto vent enables you to keep the temperature and air flow at an appropriate level. Removable shelving creates plenty of room for taller pots and allows plants to grow from the bottom to the top of the greenhouse, ideal for grow bags.

Mini Greenhouse.

The Mini Greenhouse is the perfect planting solution if your garden space is at a premium and you don't have room for a full scale greenhouse. Using a greenhouse protects delicate plants from the harsh, cold weather and hardens them off before planting outside. Not only is this Mini Greenhouse superbly practical it looks great too.

The front edge is lowered to encourage efficient rain water run-off and allow maximum light to enter the interior through the styrene glazing. It has excellent flexibility, with two independently opening lids that can be propped open and double doors – you can control air flow and temperature easily and only open the sections you need to access. Inside the greenhouse there are two shelves and the base is designed to fit a standard size grow bag.

MINI GREENHOUSE
MGH(HD)
144(h) x 120(w) x 62(d)cm

Plant to your hearts content with our potting shed, potting bench and cold frame. Ideal for planting or cultivating and nurturing fruit, vegetables and flowers.

Potter, Ponder, Play.

This garden building will help keep your garden clutter free and offers a secure space for you to store garden equipment. Far more than just a storage space, this potting shed has been carefully designed to maximise the elements that are prime for planting, seeding and potting.

With 10 fixed windows it lets in extra light. Two opening windows help keep the temperature and air flow at an appropriate level. The design features smaller sections, making it easier to handle and to assemble.

- Supplied with two sets of two-tier modular plant staging that can be positioned in a row in front of the window or in the corner
- The windows are made from shatterproof PET glazing, which will not become yellow or brittle over time
- Modular in its design, it allows you to choose whether to hang the door to the left or the right of the window panel and which way it opens
- Built using interlocking Shiplap Tongue & Groove boards which make it robust and weather resistant
- Smooth-planed barge boards and felted roof give it an attractive finish

Ecodek Heritage Composite Deck Kit.

Our composite deck kits contain all the components you need to build a contemporary, stylish deck area in your garden. Quick and easy to build, you can create an area to entertain friends or simply somewhere to unwind. Low maintenance and ideal for small gardens or courtyards. The kit contains everything you need including timber joists for the base.

With a choice of 2 colours, the deck boards can be fixed either side up showing a natural wood grain effect or more contemporary ridged profile.

Expert insight.

Designed to have the look and feel of natural timber, Ecodek deck boards are made up of recycled polyethylene and hardwood fibres from sustainable sources.

Fencing & Gates.

On the fence? Here's how to choose.

Your fence frames your space. The height and style of fence you choose can have a big impact on the look, feel, and even the noise in your garden. That's why it's important to consider what you need your fence to do, and also what you're allowed to place on your property's boundary.

We have a wide range of panels that offer different combinations of privacy, security, aesthetic and noise reduction features. Once you've selected the panels that best suit your needs you're able to add any fence posts that you need as well as any accessories – choose from Gravel Boards, Post Caps, Decorative Finials and Fence Toppers or our Fencefast installation system – all of the items you need for your fencing project are available for Home Delivery with your panels.

Delivery.

Forest's range of Fencing and Trellis is available for Home Delivery – subject to a minimum order of 3 panels.

5-step guide:

- 1 CHOOSE YOUR STYLE
- 2 CHOOSE YOUR TREATMENT
- 3 CHOOSE YOUR HEIGHT
- 4 SELECT A MATCHING GATE
- 5 SELECT POSTS & ACCESSORIES

Acoustic Ratings.

The Decibel Noise Reduction Panel is rated with Forest's highest acoustic rating of 4, achieving a reduction in noise level of up to 30dB. We've also tested and applied acoustic ratings to some of our most popular panels.

1 Traditional Larchlap Panels.

SHOWN ON PAGE 64

Sturdy panels constructed with overlapping boards, sandwiched between a perimeter frame. Great value panels available in straight cut boards with a rustic finish. Provide privacy and are perfect for marking boundaries.

2 Closeboard Panels.

SHOWN ON PAGE 65

Traditional panels made from thick overlapping square cut boards, arranged vertically and sandwiched by a frame all the way round. Strong, durable panels ideal for boundaries when privacy and security is required.

3 Featheredge Panels.

SHOWN ON PAGE 66

Traditional panels with thick tapered overlapping vertical boards with 3 colour alternatives to suit any garden. Heavy duty construction, ideal if you want privacy and extra security.

4 Tongue & Groove Panels.

SHOWN ON PAGE 67

High specification panels, featuring thick section interlocking Tongue & Groove boards, sandwiched in a quality rebated frame. These strong, contemporary panels look great and offer a high level of security and privacy.

5 Decibel Panel.

SHOWN ON PAGE 68

Designed to help reduce unwanted noise in gardens by busy roads or with close neighbours. Using thick interlocking Tongue & Groove boards, the panel combines noise reduction performance with great looks.

6 Contemporary Panels.

SHOWN ON PAGE 70

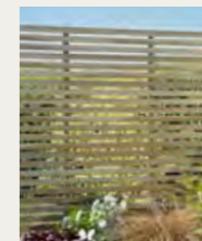

A range of stylish and modern panels made from sturdy horizontal slats. Ideal for use along boundaries or as a garden partition. Includes a range of 6ft pre-painted grey panels to transform your garden giving it a strong contemporary look.

7 Decorative Panels & Screens.

SHOWN ON PAGE 72

Our collection of decorative panels have a high quality, smooth-planed finish and come in a variety of styles - available with curved, straight or trellis tops. Our screens are designed as a decorative feature and can let in light to give a more open feel to your garden.

8 Low Level Fencing.

SHOWN ON PAGE 75

A traditional style of palisade fencing that offers an unobtrusive partitioning solution. Ideal for marking boundaries, these panels will create a decorative addition to your garden.

Image courtesy of Grace's Guide to British Industrial History.

Larchlap Panels.

We believe that creating a space you're proud of starts with a product we're proud of. And our Larchlap collection is no exception. Timber for the entire range is grown and felled in UK forests, processed in our UK sawmill and the fence panels are assembled by our skilled workforce at our factory in rural Worcestershire.

The traditional British Larchlap panel has stood the test of time for over 50 years, originally designed by Joseph Corbett & Son in Worcestershire, the company and famous Larchlap panel proudly became part of Forest Garden.

Expert insight.

High specification panels, featuring thick section interlocking Tongue & Groove boards, sandwiched in a quality rebated frame.

Keeping the *noise down*. The Decibel Noise Reduction Panel.

This award winning innovation from Forest can reduce the noise level down from average road traffic or a typical petrol lawnmower enough to be able to hold a normal conversation on the other side of the fence.

PROFILED TONGUE & GROOVE CONSTRUCTION

4 UP TO 30dB REDUCTION

15 YEARS Anti-Rot Guarantee

Domestic fencing with a difference.

Whether you view your garden as a peaceful place, or a private space, the award winning Decibel Noise Reduction Panel will help reduce unwanted sounds making it feel calmer all round.

The panel combines noise reduction performance with great looks. Thick (17mm) interlocking Tongue & Groove boards are smooth-planed and mounted in a 45mm thick rebated frame to ensure there are no gaps for the noise to pass through.

Acoustic Ratings.

The Decibel Noise Reduction Panel is rated with Forest's highest acoustic rating of 4, achieving a reduction in noise level of up to 30dB. We've also tested and applied acoustic ratings to some of our most popular panels.

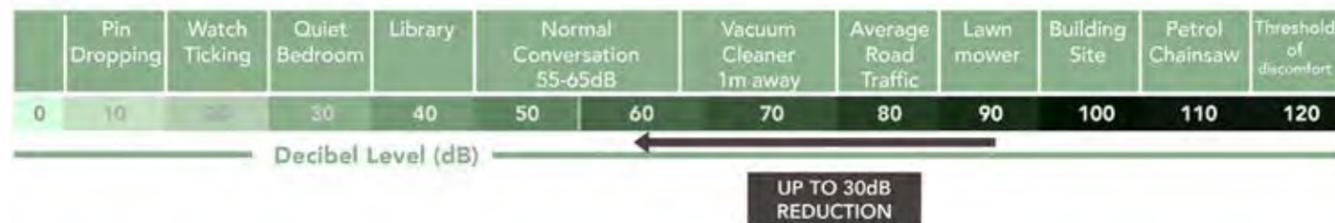

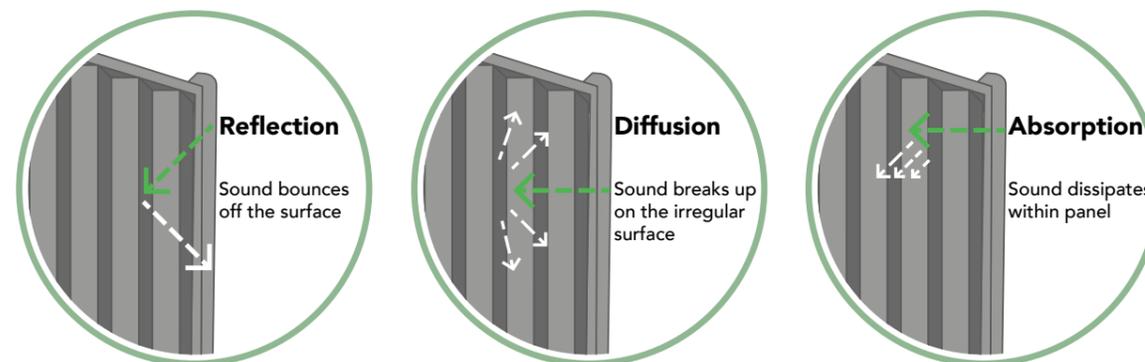

4 UP TO 30dB reduction.	3 UP TO 25dB reduction.	2 UP TO 20dB reduction.	1 UP TO 10dB reduction.
--------------------------------	--------------------------------	--------------------------------	--------------------------------

Independently laboratory tested to BS EN ISO 10140-2:2010 in accordance with BS EN 1793-2 and BS EN ISO 717-1, achieving a reduction between 25dB and 34dB. For acoustic rating details see page 126.

Triform Technology from Forest Garden.

The boards on The Decibel Noise Reduction Panel feature a specially developed triangulated profile. This creates multiple angles over the face of the board which scatter noise waves, reducing their intensity. The Decibel Noise Reduction Panel will look great in any garden and is perfect for houses with close neighbours or for gardens near busy roads.

15 YEARS Anti-Rot Guarantee

4 Acoustic Rating

DECIBEL NOISE REDUCTION PANEL
The tight-fitting boards and smooth-planed finish bring out the natural beauty of the wood. The panels can be mounted with the boards running vertically or horizontally to accentuate either the height or length of the fence run.

UNI80	240(h) x 6(w) x 6(d)cm

 *Expert insight.*

There are many ways to erect a timber fence. Whichever method is chosen, you can guarantee success if you follow some basic rules.

- Non Pressure Treated fence panels should always be erected on Pressure Treated gravel boards
- Use suitable posts. Heavier fence panels such as Forest Closeboard and Featheredge Panels will benefit from the added strength of 10cm posts
- Check your post length before fixing. If erecting over uneven ground you may require longer posts
- Use Fencefast Easy-Fit products to make replacing a damaged post quicker and easier

Fencefast.

Fencefast ground spikes consist of a long steel spike with a square clamp at the top which holds the post. The spike is driven into the ground using a driving tool and a sledgehammer.

Fencefast ground spikes offer an alternative to digging a hole and setting posts in concrete. They can be used for posts for fence runs or for anchoring other garden structures such as arches and pergolas.

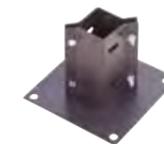

How to install Fencefast.

- 1 Installation of the spike will be easier if a pilot hole is made before driving the spike into the ground. If available, use a steel rod or similar and drive a straight hole in the desired location around 20 – 30 cm deep. 
- 2 Push the tip of the Fencefast spike into the pilot hole and insert the driving tool* into the clamp of the Fencefast unit. Using a spirit level, ensure the Fencefast assembly is straight (vertical). 
- 3 Begin driving the spike into the ground using a sledgehammer**. Use small blows at first. 
- 4 Regularly check that the unit is straight using a spirit level on adjacent sides of the clamp. 
- 5 Once the spike is fully in the ground, with the base of the clamp level with the ground, insert the post into the clamp and tighten the bolts. 

EASY-FIT FENCEBASE

Fence post support for use on surfaces which can be drilled to accept expansion bolts, such as decking, slabs and concrete.

FBEF65(HD)	65-80mm post size
------------	-------------------

FBEF90(HD)	85-105mm post size
------------	--------------------

EURO U-BRACKET

For use with Forest Europa fence range (40mm frame width). Used to mount fence panels to timber posts. Screw to post, slot panel in then screw through bracket into panel.

FXEU(HD)	
----------	--

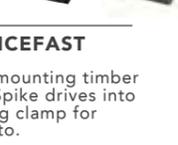

FENCEFAST DRIVING TOOLS

Used for driving Fencefast spikes into ground. Slots into Fencefast clamp, providing a solid surface to impact with sledgehammer in order to drive spike into ground.

DD02EF(HD)	45-65mm post size
------------	-------------------

DD04EF(HD)	90mm post size
------------	----------------

FENCEFIX U-BRACKETS

Used to mount fence panels to timber posts. Screw to post, slot panel in then screw through bracket into panel. For panels with frame width up to 50mm.

FXU25(HD)	
-----------	--

FENCEFIX L-BRACKETS

For fixing panels, trellis and gravel boards to timber posts. Screws into post, providing a bracket to mount product to.

FXL03(HD)	
-----------	--

EASY-FIT FENCEFAST

Post holder for mounting timber posts into soil. Spike drives into ground providing clamp for securing post into.

FEF4545(HD)	45-60mm post size 450mm spike length
-------------	---

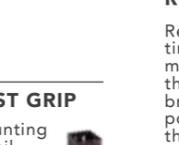

FEF6560(HD)	65-80mm post size 600mm spike length
-------------	---

FEF6575(HD)	65-80mm post size 750mm spike length
-------------	---

FEF9075(HD)	85-105mm post size 750mm spike length
-------------	--

FENCEFAST EASY-FIT CONCRETE IN

Post holder for setting into concrete. Set stem into concrete and use clamp to secure post into.

FEFC65(HD)	65-80mm post size
------------	-------------------

FEFC90(HD)	90-105mm post size
------------	--------------------

EASY-FIT REPAIRFAST 65MM

Repair solution for timber posts originally mounted in concrete that have rotted or broken. Remove old post to ground level then drive spike into post and hole in concrete.

FEFR65(HD)	65-80mm post size
------------	-------------------

 *Expert insight.*

Check location of all underground services (electricity, water, drains) before using Fencefast spikes.

*Two sizes of Fencefast driving tool are available. The smaller DD02EF driving tool is for use with the smaller FEF4545. The larger DD04EF driving tool is for use with the FEF6560, FEF6575 and FEF9075 Fencefast spikes.

**Ensure that the sledgehammer is only used to impact the driving tool – the Fencefast unit must not be impacted directly.

Sheds & Workshops.

Give yourself some shed space.

A shed is the most practical of garden structures. Not only will it keep your tools tidy and your outdoor equipment organised, it's perfect for storing bikes, boots and mowers.

But, deciding which shed is right can be tricky, so we've made the process as simple as possible with our 6-step guide.

6-step guide:

- 1 CHOOSE YOUR SIZE
- 2 CHOOSE YOUR STYLE
- 3 CHOOSE YOUR CONSTRUCTION
- 4 CHOOSE YOUR TREATMENT
- 5 PREPARE YOUR BASE
- 6 CHOOSE YOUR DELIVERY

SEE OUR SHED AND GROUND PREPARATION VIDEOS AT FORESTGARDEN.CO.UK

SHEDS & WORKSHOPS

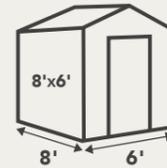

6-step guide to choosing your shed.

1 Choose your size.

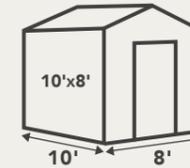

Whether you're after something compact for tools or something spacious for larger equipment, our shed range offers a practical solution whatever size of space you have.

Small and compact shed perfect for neatly storing garden tools.

Mid-size shed suitable for large equipment like lawnmowers and bikes.

Large, spacious shed ideal for storage or as a functional workshop.

All of our shed descriptions are quoted with the longest length first.

2 Choose your style.

We offer 4 styles of shed:

APEX

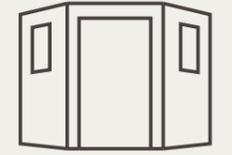

PENT

REVERSE APEX

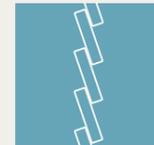

CORNER

3 Choose your construction.

We offer 3 styles of cladding:

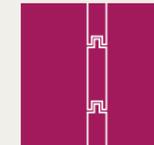

OVERLAP

Rough-sawn boards overlap to ensure water run-off.

SHIPLAP TONGUE & GROOVE

Interlocking Tongue & Groove boards with a shiplap profile for water run-off.

TONGUE & GROOVE

Tight-fitting Tongue & Groove boards for wind and rain protection.

4 Choose your treatment.

We offer 2 types of timber treatment:

10 YEARS Anti-Rot Guarantee

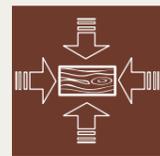

DIP TREATED Surface treatment, providing short term protection against rot.

15 YEARS Anti-Rot Guarantee

PRESSURE TREATED Penetrative treatment for 15 year Anti-Rot protection.

Boards are dipped in anti-fungal solution.

Anti-fungal preservative is forced into the timber under pressure.

5 Prepare your base.

We recommend you prepare your base before installation in 1 of 3 ways:

CONCRETE SLABS

Slabs neatly laid with minimal gaps on a dressing of sharp sand and hardcore.

CONCRETE

Solid concrete base will minimise movement of sub-soil ensuring longevity.

SHED BASE

A timber frame attached to stakes driven into the ground.

6 Choose your delivery.

We have a range of delivery and assembly options to help you plan and prepare for the arrival of your shed:

DELIVERY

Estimated nationwide delivery direct to your door within 5 working days.*

PICK-A-DAY

Choose your delivery date ensuring time to prepare your garden.

ASSEMBLY

Available on all sheds to ensure they're constructed safely and correctly.

*Delivery times subject to product availability and any Covid-19 restrictions in place at the time.

SEE OUR BETTER SHED VIDEOS AT FORESTGARDEN.CO.UK

What makes a *Better Shed*?

Stronger construction.

Reducing panel sizes adds in more timber and the framing around each increases overall strength. So each individual panel is stronger and also makes all the boards less likely to warp. Add in a solid timber board floor and you have a better shed from the ground up.

Faster to assemble.

Smaller, smarter panels make for a quicker to build shed. They are easier to fit and work with. Plus they add more options to the design and placement of walls and windows. For our larger sheds, the addition of new metal roof truss brackets increases shed strength whilst making it easier to build big.

Easier to handle.

Easy to transport. Easy to handle. Easy to enjoy. Our 50 years of making timber garden products for the UK means we know a thing or two about ease of construction. With this range we made it our business to look for new ways to make easy even easier. Smaller sections mean our sheds can even be carried through your house if garden access is restricted.

Enhanced security.

We don't want you to worry about the safety of your shed. For peace of mind we have added hidden hinges that cannot be unscrewed from the outside and a robust plate hasp and staple latch. In addition, the windows are Shatterproof PET glazed windows.

Highly adaptable.

As no two gardens are the same, enjoy a shed that works for you. The panels, windows and doors can be re-configured – your shed, your way. Flexibility has been built into our sheds. This means the position of the doors, the window panels and even the direction the door opens is all in your hands. After all it is your garden.

Why you need a *Better Shed*

Made by forest

Our love of gardens is part of being British. So it is only right that a garden shed takes pride of place. Our new range builds on that garden love affair. We use more timber for a stronger build, plus all panels are smaller – making them easier to transport, handle and construct. The doors and window panels can also be configured to suit your needs. The result is a shed that works brilliantly, looks great and is super welcoming. A garden deserves nothing less.

The *Better Shed* Range.

The three shed ranges offer great solutions whatever the garden aspect, practical demands or lifestyle needs. Whichever way you look at it, a Better Shed is better through and through.

Lean To Shed Kits.

Ideal when you need extra space for storing bulky items like wheelbarrows that benefit from being undercover but don't need to be inside the shed – they make a perfect log store too.

Designed to be used with the corresponding size of Overlap Pressure Treated Apex shed, they can be fitted either side. Installation option only available when purchased at the same time as a shed.

Whilst these Lean To Kits will fit Overlap Dip Treated Sheds of the corresponding size, please note that the timber colour will be different due to the treatment applied.

Overlap & Shiplap Shed Bases

Our easy to build shed base is made from incised and UC4 Pressure Treated timber, protecting it from rot and preventing your shed from contact with the ground.

Only suitable for use with Forest Overlap Dip or Pressure Treated or Forest Shiplap sheds of the corresponding size.

Your Garden Retreat.

Hand made to order from the finest materials, 50 years of experience and expertise come together in our Forest Retreat Sheds, representing the very best of our range.

Made from smooth-planed Redwood lap boards and a substantial framework, these buildings are built to last. The steep pitch roof offers extra headroom and the Canadian Red Cedar Shingles give the roof a beautiful, high-end finish.

With a choice of 3 colours chosen to complement the natural habitat, this shed is guaranteed to make a grand statement in any size of garden.

- Highest quality kiln dried, smooth-planed Redwood lap boards
- 20mm wall thickness at point of board overlap
- Opening windows, glazed with 4mm toughened glass
- Pressure Treated interlocking Tongue & Groove boarded floor and roof
- Canadian Red Cedar Shingle roof
- Delivery and installation on site is included in the price
- A choice of 3 factory finished paint colours

XTEND BY FOREST GARDEN BUILDINGS

PEACE OF MIND
AFFORDABILITY

Space is at a premium in most homes and extensions are costly. An Xtend garden building is constructed from high quality, energy efficient materials and is underwritten with a 15 year structural guarantee. You can be confident with Xtend that quality has not been compromised over price.

EASE OF
CONSTRUCTION

Xtend is a clever choice for your garden building as it comes delivered in pre-cut modular SIPs panels ready for assembly. Some of the best designed new homes are now made this way, so why not your new garden building? A step-by-step guide means the build is incredibly straightforward.

YEAR ROUND
ENERGY EFFICIENT

Keeping you warm in winter and cool in summer, Xtend delivers real energy efficiency. Double glazed windows, highly efficient insulated walls, roof and floor combine to drive down energy costs. It's a fact that Xtend garden buildings can be as energy efficient as a new-build home – with an EPC energy rating of B.

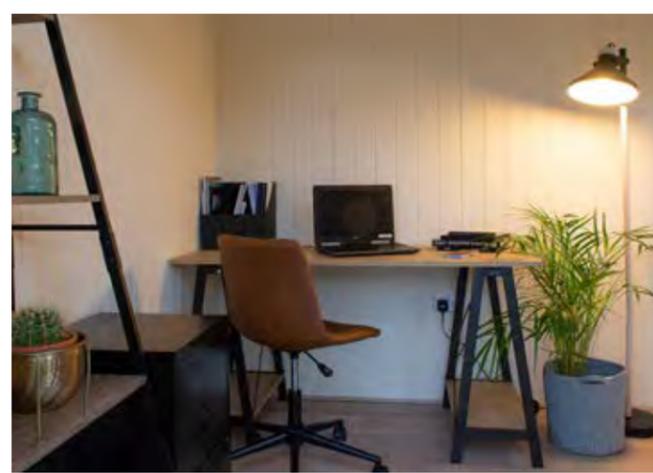

AESTHETICALLY
PLEASING

It only takes a glance, to see that an Xtend building has the pleasing lines and contemporary design to catch the most discerning eye, Xtend is at home in any garden, be it traditional or modern, that is how great design is meant to be.

Balance your work life *in your garden.*

Achieve your work/life balance with the new Xtend range of garden buildings from Forest Garden. These new buildings have everything you could wish for in a home office - contemporary looks, real energy efficiency, ease of construction and keen pricing.

STRUCTURAL INSULATED PANELS (SIPs)

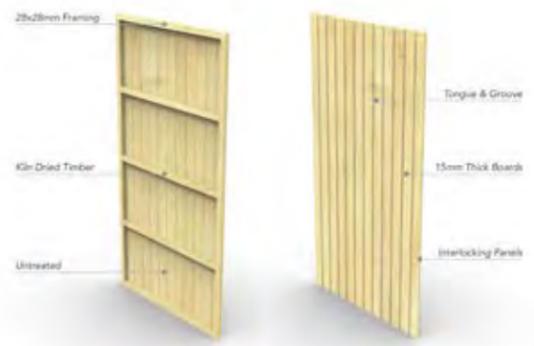

- Total wall thickness including SIPs panels, internal and external cladding and cavities is 177mm
- Roof is 11mm OSB + 100mm insulation + 11mm OSB = 122mm total
- 97mm thick insulated walls consist of 75mm of polystyrene insulation sandwiched by two sheets of oriented strand board (OSB)

The core structure of an Xtend building is made from SIPs panels - high performance material for building construction. The 21st century way to build.

EXTERNAL CLADDING

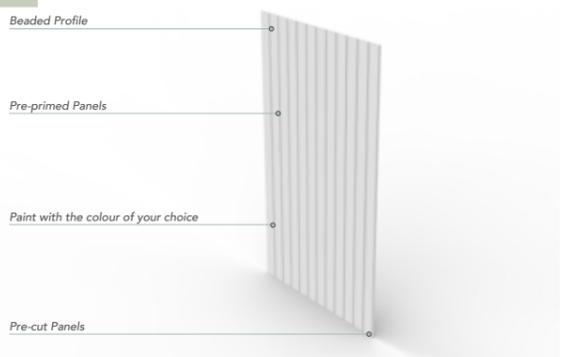

- No measuring and cutting every single batten and board to size before mounting
- Cladding panels are simply positioned on the building and screwed into place
- Panels are made with 15mm thick premium interlocking tongue and groove boards mounted to framing battens

Pre-cut external timber cladding panels for quick and easy assembly.

INTERNAL CLADDING

- Wall panels are mounted to 28mm thick battens creating a cavity perfect for routing electrical wiring
- Roof battens are 45mm thick to allow for recess roof lights to framing battens

Pre-cut interior MDF panels for quick and easy assembly for walls and ceiling.

WINDOWS & DOORS

Window material uPVC 5 chamber
Window colour Anthracite grey externally with grained finish Smooth white internally
Window locking Two double clasp, mushroom headed espagnolettes

Door material uPVC reinforced 5 chamber
Door colour Anthracite grey externally with grained finish Smooth white internally
Door locking 7 point multi-lock with ultion three star security barrel
Glazing 28mm, A rated, double glazed, safety glass

ROOF COVERING

- Does not crack, split or rot and does not support moss or algae growth
- UV stable & environmentally friendly
- Safe and easy to install with one piece sheet which means no joints and no leaks
- 50 years roof life expectancy
- Anthracite grey fascias included

External roof covering is made from 1.2mm thick EPDM black rubber which creates a maintenance free waterproof membrane.

ENERGY EFFICIENCY

- Double glazed windows
- Warm in Winter, cool in Summer
- Energy efficiency model rating of 78 (category C)*
- Potential to increase to 82 (category B) with the addition of a photovoltaic solar panel

Energy Efficiency Rating		Current	Potential
Very energy efficient - lower running costs			
(92-100)	A		
(81-91)	B		
(69-80)	C	78	82
(55-68)	D		
(39-54)	E		
(21-38)	F		
(1-20)	G		
Not energy efficient - higher running costs			
England & Wales		EU Directive 2002/91/EC	

Highly efficient insulated walls roof and floor
 * based on lighting from 3 x 4 watt LED bulbs and heat from a high efficiency wall mounted heat pump.

Log Cabins.

Manufactured from kiln-dried timber, a Forest Log Cabin is the natural choice to create that extra outdoor living space. These traditional timber buildings will look great in any garden environment as well as giving you the space and freedom to enjoy the things you love.

Entertain and maintain.

We know you'll be keen to start entertaining and using the space straightaway, but we strongly advise applying a solvent-based preservative treatment inside and outside soon after assembly. As the UK has a very wet climate it is important to ensure that the timbers remain dry and protected until such time as a treatment is applied.

Whilst the timber we use will change colour over time, simply re-apply a colour-based timber treatment regularly to maintain the look. Timber is a natural material which will shrink and expand due to moisture content within wood and the changing weather conditions. Any extreme changes should revert back over time.

PRECISION ENGINEERED

Our precision-engineered logs are manufactured with chalet-cut corners and a 6-sided joint to reinforce stability against the UK's wind and rain.

SUSTAINABLE TIMBER

The timber we use is slow grown Nordic Spruce, clear from the tight growth rings on the logs. It's also FSC® certified to ensure the sustainability and longevity of supply.

Expert insight.

Visit our website to view videos on how to prepare a base and step by step guides to building your cabin.

SEE OUR LOG CABIN VIDEOS AT FORESTGARDEN.CO.UK

24KG POLYESTER FELT

An excellent value felt with a life expectancy of 15 years. Uses a weave of fibres giving it twice the tear resistance of mineral felt. Can be used as a single layer but increased performance is achieved by installing over an underlay felt.

34KG POLYESTER FELT

A higher grade version of the 24kg weight felt, with a thicker bitumen waterproof layer. This gives it even greater tear resistance and a life expectancy of 20 – 30 years. It is installed over an under-layer of sand felt.

FELT SHINGLES

An alternative to the Polyester Felt on Apex Roofed Log Cabins. Used in conjunction with a black sand felt underlay, the shingles offer a different aesthetic to plain felt, giving a 'tiled' effect. Life expectancy of the Felt Shingles is 10 years.

DOORS & WINDOWS

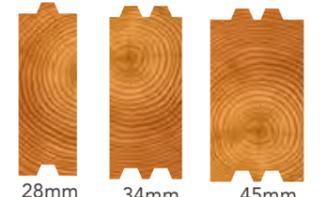

All models come with adjustable door hinges and mortise lock mechanisms as standard, with opening windows available on most. Check specific models for details.

The doors on all Forest Log Cabins all have fixed windows. While some models are single glazed or have the option of single or double glazing, most are double glazed. All glass is toughened for safety and opening windows feature tilt & turn opening mechanisms.

ROOFS AND FLOORS

The roofs and floors in all our cabins are constructed from kiln-dried Tongue & Groove boards. Different roof felt options are available. We recommend the roof options that include underlay.

AVAILABLE THICKNESSES

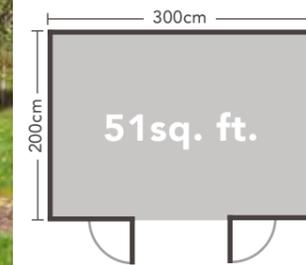

Our Log Cabin range is available in three log thicknesses.

The Harwood - 3m x 2m

220(h) x 320(w) x 232(d)cm with overhang

Care & Attention.

Here at Forest, we put a lot of care and attention into the manufacture of our products. From selecting just the right type of wood, to our flexible delivery and assembly service options, we take a pride in ensuring that everything is just so.

Therefore, to help you get the most out of our products, here are a few things you should know...

Wood is a natural product and susceptible to changes in the environment, any extreme weather conditions will cause a reaction in timber used outdoors. Heat may cause panels to lose shape but this will be reversed once the temperature subsides. Posts and uprights may split but again this is natural and will not affect the structure of your product.

All timber will take time to settle in its outside surroundings. In the winter months the wood will swell due to moist air whereas in the summer the wood may shrink. Movement and gaps in the wood are normal, particularly with overlap constructions.

Some pressure and dip treatment colour may leach out over time. This may cause discolouration to surfaces the product may sit on such as painted walls, decking and paved areas.

Timber treatment.

Forest products are guaranteed against rot through either Pressure Treatment or Dip Treatment.

Pressure Treated timber.

Forest Pressure Treated items which are designed to be in ground contact are impregnated with preservative, an effective method used to protect wood against fungal decay and insect attack, saving time and money on retreating. The treatment is based on the well-established effectiveness of copper combined with a co-biocide.

If the treated timber is cut, notched or drilled, it is recommended that an effective cut end treatment be applied. Failure to do so may reduce effectiveness of the Pressure Treatment.

Stains, paint and water repellent may be applied after purchase providing you follow the manufacturer's instructions.

15 YEARS
Anti-Rot Guarantee

PRESSURE TREATED
Penetrative treatment for 15 year Anti-Rot protection.

Anti-fungal preservative forced into the timber under pressure.

Dip Treated timber.

Dip Treated products should be isolated from the ground with a Pressure Treated gravel board or similar base and be retreated yearly to comply with the conditions of the guarantee.

To change the colour of the timber, allow the product to mature before applying a suitable brand of stain/paint.

10 YEARS
Anti-Rot Guarantee

DIP TREATED
Surface treatment for 10 year short-term, Anti-Rot protection.

Boards are dipped in anti-fungal solution.

Some other things you should know.

Stockists: We have a great network of stockists across the UK and online, for a full list please visit www.forestgarden.co.uk

Pricing: Please refer to our website for current Suggested Retail Prices that are inclusive of the prevailing VAT rate.

Delivery: The majority of Forest products come flat packed and will require assembly (unless stated). On some products pre-drilling may be required. Estimated DIY times are indicated in hours. Products available for Home Delivery are marked with (HD) following the product code. Products available for Home Delivery and Assembly are detailed with an (INST) or (IN) code. Please note, for Installed items (with the exception of Vale Greenhouses and Retreat Sheds) delivery and installation will be on separate days.

Home Delivery is unable to be offered for the following postcodes, BT, GY, HS, IM, IV41-51, IV55-56, JE, KA27-28, KW15+, PA41+, PH41-44, PO31-41, ZE. Whilst we aim to deliver within 5 working days there will be some instances when it will take longer, including Scotland, hard to reach locations or when items are out of stock. Delivery lead times are also subject to any Covid-19 restrictions in place at the time. Please note Xtend Buildings, Log Cabins, Round Timber Gazebos, Retreat Sheds and Vale Greenhouses are special orders and have longer delivery times detailed. Refer to forestgarden.co.uk for latest lead times.

FSC: Forest's range is certified by the Forest Stewardship Council® with the exception of our willow products and Round Timber Gazebos.

Ongoing care.

We recommend some annual after care, which will help protect the wood and make it more durable to ensure it lasts longer.

Preservatives, also known as wood treatment, can protect all types of timber from discolouration and decay, as well as giving a constant all-year-round colour. An annual wood preservative paint will protect your new purchase or rejuvenate an existing one.

Wood colouration.

Pressure Treated wood colouration varies depending on timber species and length of time from treatment. The colour will fade over time to a silver/brown.

Dip Treated product colour is not permanent and to retain factory finish treatment should be applied regularly.

Cedar shingles used on the roof of our Round Timber Gazebos and Forest Retreat Sheds will fade over time to a silvery, grey colour.

Where to site your product.

The base for any product should be firm and level; ideally air should be able to circulate under the base. Wooden buildings must not be sited directly on soil or grass. Our sheds are all provided with bearers to allow air flow under the shed. See forestgarden.co.uk for our base preparation guides.

Any questions?

For more information visit forestgarden.co.uk/help-support, call our technical department on 0333 777 7089 or talk to us via live chat on our website.

Specifications: All specifications detailed are correct at the time of going to print, overall sizes quoted are approximate. We reserve the right to alter the specifications of our products at any time. All Forest products (unless stated) are supplied unpainted. Log Cabins are supplied untreated.

Acoustic Rating System:

- **Rating 4** equates to 8-fold noise reduction or up to 30 decibels.
- **Rating 3** equates to 6-fold noise reduction or up to 25 decibels.
- **Rating 2** equates to 4-fold noise reduction or up to 20 decibels.
- **Rating 1** equates to halving noise reduction or up to 10 decibels.

Independently laboratory tested to BS EN ISO 10140-2:2010 in accordance with BS EN 1793-2 and BS EN ISO 717-1, achieving a reduction between 25dB and 34dB.

Guarantees: Please retain receipt as proof of purchase. Please see website for full conditions of Forest guarantees - www.forestgarden.co.uk/help-support

Ecodek Heritage Composite Deck kits come with a limited 25 year warranty against structural failure caused by wood-eating insects, splitting and splintering. The product must have been installed and maintained in accordance with the guidelines.

Forest painted timber products (excluding Forest Retreat Sheds) are pre-treated with an aqueous industrial wood preservative prior to painting. To maintain the paint finish, it is recommended that the products are repainted after 3 years.
